

BUILDING TODAY'S YOUTH FOR THE FUTURE

How to Make Progress in Tough Times

Prof. Rohan Munasinghe

Professor,

Department of Electronic and Telecommunication Engineering,
Faculty of Engineering, University of Moratuwa

Thriving in Tomorrow's Workforce

Dr. Ruchira Wijesena

Senior Lecturer,

Institute of Technology,
University of Moratuwa

Synopsis

In this seminar we highlight the transformative nature of the future job market, driven by rapid technological advancements and evolving global dynamics. Today's youth will have to explore how new technologies such as artificial intelligence, nanotechnology, neural technology, are reshaping industries and creating new opportunities, as well as challenges for the workforce. Various societal issues and barriers make youth undergo transition periods in their lives, struggling to cope with their future career perspectives while handling external pressures. In such situations, true professionalism is critical to thriving in the future workforce. Core attributes of true professionalism include the ability to see the bigger picture, effectively manage real-world situations, uphold strong ethical standards, and demonstrate flair. By embodying these qualities, individuals can not only secure employment but also drive innovation, contribute significantly to their organizations, and lead meaningful, impactful careers.
